

## Exercise 1

### Task 1

#### Functional:

As an admin I want to ban people from the forum, so that they stop spamming posts.

As a user, I want to sort/filter/search through the posts and merchandise so that I can find what I want quicker

As a user, I want to be able to delete and edit my posts, if by chance I'm not happy with it anymore

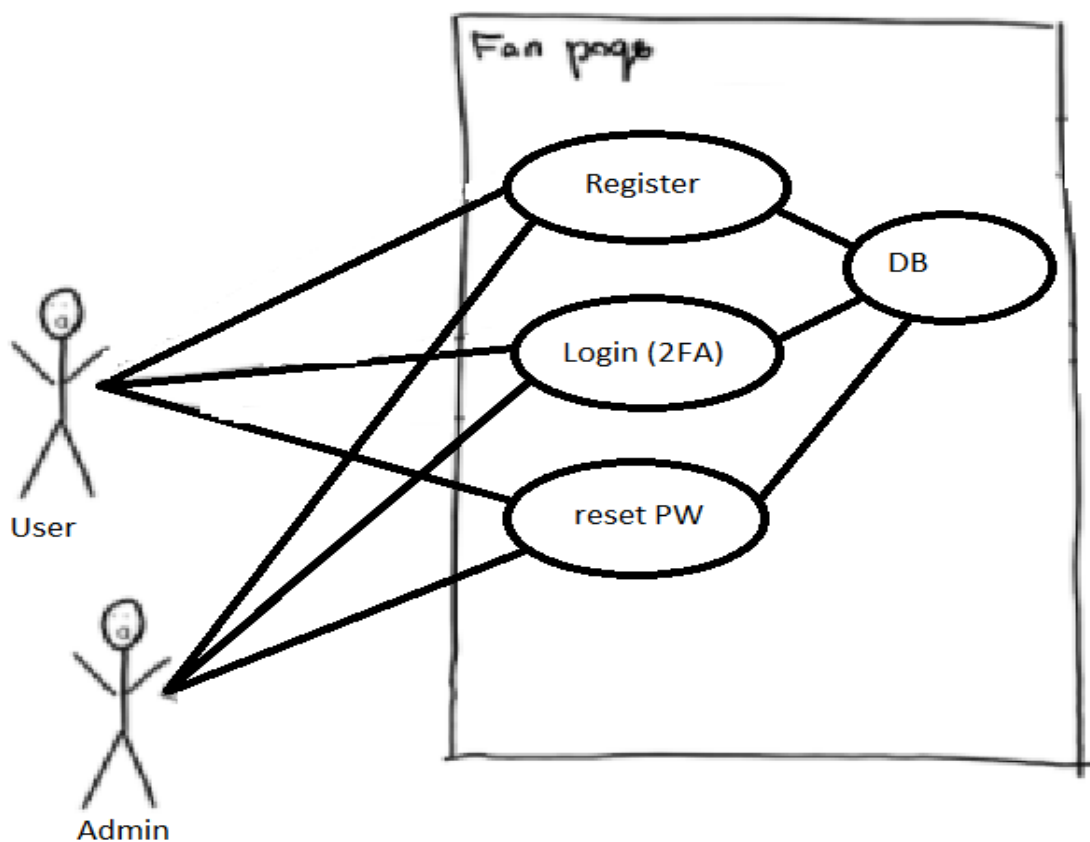

#### Non-Functional:

As a user I want to be able to see my uploaded posts for sure on the frontpage after a certain time (< 1min).

As a user I want to be able to login fast (< 1s).

As a user I want my username to be unique and only available to me.

### Task 2

### Task 3

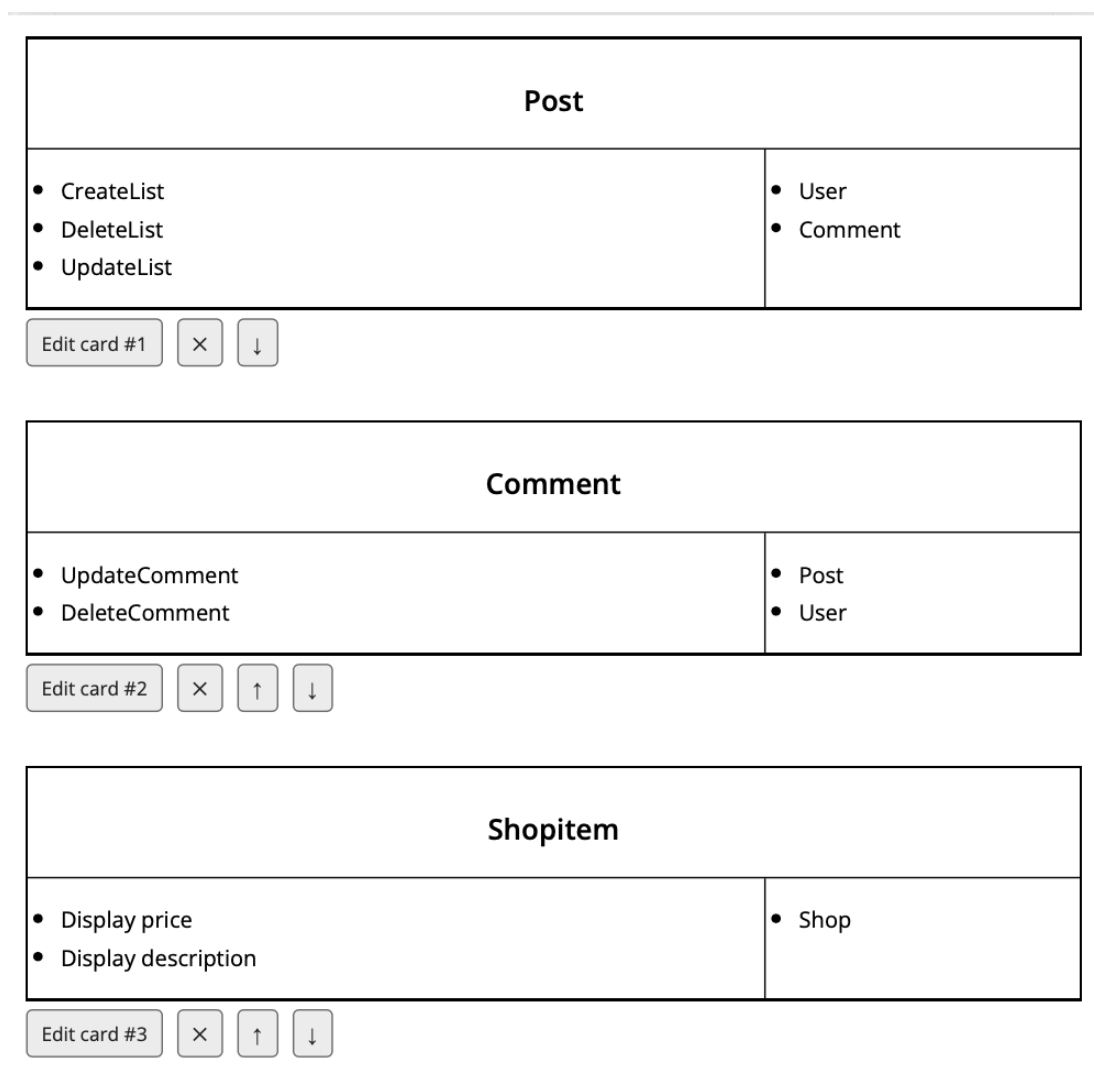

Register: This use case allows a user to be authenticated by the authorization service.

Password Reset: This use case is the operation of resetting a lost or forgotten password, with a new one by the use of some alternative means of authentication. Usually by sending an email with a reset link to the email address that is registered in the users account.

Login: This use case can only occur after registration and allows the user to quickly login into the system without having to register every time they want to access the webpage

### Exercise 2/4 (Updated)

#### Task 1

User	
<ul style="list-style-type: none"> <li>• Register</li> <li>• Login</li> <li>• Logout</li> </ul>	<ul style="list-style-type: none"> <li>• Post</li> <li>• Comment</li> <li>• Profile</li> <li>• Shop</li> </ul>

## Task 2

additional mockups for the login and registration feature:

Hand-drawn mockup of a website layout on grid paper.

**Header:** <http://www.fanpage.com/>

**Navigation Bar:** Our logo | Shop | News | Forum

**Main Content Area:**

- Left Column:**
  - pic of item
  - shop details
  - price
  - Other item

*clickable* (pointing to the item picture)
- Right Column:**
  - Place for news/info and stuff.
  - Short Titles
  - Clickable Buttons
  - maybe Autoswiping after like 10s

**Footer:** Adds and move Adds

**Modal/Overlay:**

also the log in / Register button change to an Account button where you can handle your Account details

**Login/Registration Form:**

Username:

Password:

**Buttons:** Login (yellow), Register (purple)

**Blog Section:**

Title 1	Short description of blog (whole thing clickable)
Title 2	

For the Registration tho we lead the user to a separate page (shown in the link) Here the side is only for registration purposes.
